### Abstract for the Database Airbnb use case

## **Finalization Phase**

# 1. Management functionality:

This database is designed for three different user groups: guests, hosts, and administrators. It is tailored to meet the needs for functioning in the Airbnb use case. Data is stored in 27 different tables each of which corresponds to a specific operation.

For guests, it is easily possible to search for a listing setting different filters. For example property type, size, or costs. This Database schema also allows one to make a reservation and money transactions supervised by the administrator user group.

Hots can update or create a new property listing with the necessary data and update its availability. They can also look up the personal information of a guest, make contact and see if there is a common language to communicate with. Property data stored in this schema include images, rules, costs, amenities, and more.

Administrators supervise the payment procedure and make payments to the host after the transaction from a guest to the site is completed.

#### 2. Installation:

For the creation of this Database, I used MySQL Workbench Community Edition and I recommend using it for opening this database schema.

First, install MySQL Workbench Community Edition which is free to use.

You can find it on the website: <a href="https://dev.mysql.com/downloads/workbench/">https://dev.mysql.com/downloads/workbench/</a>

After you are finished with the installation, download the datamart.sql FIL in the Development folder of this repository.

Open MySQL Workbench and click: File → Open SQL scripts → choose the datamart.sql file

# 3. Metadata:

The following picture shows the schema details.

| Table Name                   | Table Rows A | lvg row length | Data length | Index length Auto | Increment |
|------------------------------|--------------|----------------|-------------|-------------------|-----------|
| administrators               | 21           | 780            | 16384       | 0                 | 22        |
| administrators_has_languages | 42           | 390            | 16384       | 32768 NULL        |           |
| amenities                    | 25           | 655            | 16384       | 0                 | 26        |
| beds                         | 5            | 3276           | 16384       | 0 NULL            |           |
